Statement on Bon Secours Athletic Training Contract

“We are deeply disappointed that Bon Secours has elected to terminate their contract for athletic training services without a fair opportunity for further discussions to renegotiate. The timing of this decision creates a critical situation with our fall sports season already under way, which proves to be a very high volume time for medical liabilities. In spite of these circumstances, we are working diligently to fill this void and will put forth every effort to ensure the safety of our student athletes,” said Interim Superintendent Thomas Kranz. “We appreciate the services that their certified athletic trainers have provided over the last four years. We look forward to the opportunity to begin a new partnership with a service provider that truly values serving our population of students to ultimately support the continued success of our athletic teams and coaches.”
